Portfolio: https://asag.abdulsalam-s-ghaleb.workers.dev/

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of experience developing web and mobile applications and delivering end-to-end software solutions. First-Class Honors graduate in Computer Science and Software Engineering with experience across requirements analysis, frontend and backend development, REST API integration, database management, testing, deployment, and maintenance. Experienced with TypeScript, JavaScript, React, Node.js, Python, Django, Flutter, SQL and NoSQL databases, and AI-based application development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, PHP, Java, C#
Frontend: React, Next.js, Vue.js, Nuxt.js, Svelte, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Django
Mobile: Flutter, React Native
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, Appwrite (NoSQL)
APIs & Integrations: REST APIs, Stripe, XML, UBL 2.1, ZATCA Fatoora SDK
Tools & Platforms: Docker, Git, DigitalOcean, Google Cloud Platform
Other: TensorFlow, OpenCV, BeautifulSoup, Selenium, Agile Methodologies, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Engineer — Abdulwaheed Abdrabbo Abdulkhair Mohammed Est.

Jeddah, Makkah, Saudi Arabia | On-site | January 2026 – Present

- Develop the company's smart POS platform end to end, covering device software and a back-office web application using TypeScript, Node.js, and React.
- Build REST API integrations between POS terminals, payment devices, printers, and the accounting backend, synchronizing 30+ devices and reducing synchronization failures by approximately 40%.
- Lead ZATCA Phase 2 (Integration Phase) compliance by generating UBL 2.1 XML e-invoices with cryptographic stamps and TLV/QR encoding, and integrating clearance and reporting APIs through the Fatoora SDK; achieved 100% compliant e-invoicing.
- Develop accounts management modules covering journal entries, 15% VAT calculation, invoice reconciliation, and financial reporting, saving the finance team approximately 10 hours per week.

Technologies: TypeScript, JavaScript, Node.js (Express), React, PostgreSQL, SQL Server, REST APIs, XML/UBL 2.1, Docker, Git

Software Engineer — Koprey (Self-employed)

Jeddah, Saudi Arabia | Remote | September 2022 – Present

- Develop full-stack web and mobile applications for e-commerce, social media, and education domains using Next.js, React, Django, Python, and Flutter.
- Design, develop, test, and deploy software solutions based on client requirements, focusing on usability and functionality.
- Gather and document user requirements and translate them into logical and technical specifications.
- Research and evaluate technical approaches, then design, develop, and test web and mobile application solutions.
- Develop data, process, and network models to support application architecture and assess design performance and reliability.
- Plan and coordinate application development, installation, integration, and operation.
- Test, troubleshoot, document, upgrade, and maintain application software and related operating environments.
- Collaborate with engineers, project managers, and graphic designers to deliver software products that meet client requirements.

Technologies: Next.js, React, Django, Python, Node.js, REST APIs, MySQL, PostgreSQL, Stripe, WordPress, PHP, Docker, Git

Full Stack Developer — Othouba Line

Jeddah, Saudi Arabia | March 2024 – March 2025

- Architected and built responsive, SEO-optimized web applications using React and Next.js.
- Developed and integrated RESTful APIs with Appwrite as a comprehensive backend.
- Implemented CI/CD pipelines to automate testing and deployment.

Web Scraping / Software Developer — Fresh Futures Australia PTY LTD

Remote | June 2022 – September 2022

- Developed web scraping and automation tools using Python, BeautifulSoup, and Selenium.
- Increased data processing efficiency by 10x through multiprocessing.

PROJECTS

Koprey Website

koprey.kayat.site

- Developed and maintained a full-stack web platform with responsive interfaces and core application functionality.
- Implemented frontend and backend functionality, API integrations, and database-backed services.
- Improved website performance, responsiveness, and usability.

E-Commerce System with Object Recognition (AI)

- Developed an e-commerce web application that enables users to search for products using text or images.
- Built the application using Python, Django, TensorFlow, and OpenCV.
- Implemented object recognition as part of the product search functionality.

EDUCATION

B.Sc. Computer Science & Software Engineering

INTI International University & Coventry University | 2019 – 2022

- First-Class Honors | CGPA: 3.61/4.0
- President's List Award (2020)
- Dean's List Award (2021)

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Introduction to Business Analytics
- IT Infrastructure
- Project Development Using JAVA for Beginners – 2022

LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency — iBT TOEFL 91/120
