Abdulsalam Ghaleb

BCS-Software Engineering | Full Stack Developer | Desktop & Mobile Development | Artificial Intelligence (AI)
Jeddah, Makkah, Saudi Arabia

Summary

Highly motivated technology professional with a First-Class Honors dual degree from INTI International University and Coventry University, UK, and a diverse background spanning the gig economy and formal IT roles across Saudi Arabia and Malaysia. With a proven track record of successful cross-sector projects, I bring hands-on experience in software development, system integration, and IT support. Passionate about technology since the age of 12, I continuously expand my technical skill set to stay ahead of industry trends. Driven by curiosity and innovation, I thrive in dynamic environments, delivering impactful solutions through a blend of technical expertise and problem-solving acumen.

Experience

Abdulwaheed Abdrabbo Abdulkhair Mohammed Est.

Software Engineer
January 2026 - Present (11 months)
Jeddah, Makkah, Saudi Arabia

Enterprise Operational CRM & Customer-Facing Platform
Engineered a unified digital ecosystem for a high-volume local service business, modernizing internal operations through a real-time edge CRM and expanding market reach via a high-performance web platform.

Key Achievements & System Architecture
- Edge-Deployed Operational CRM: Designed and built an offline-first Progressive Web App (PWA) to replace legacy paper and spreadsheet workflows, unifying customer profiles, order management, and custom client specifications into a single source of truth.
- Scale & Efficiency Impact: Scaled system to handle 5,000+ active customer records and 20,000+ completed orders, reducing record retrieval times from 5–10 minutes down to instant search.

- High-Converting Customer Web Platform: Developed a localized Arabic-language PWA featuring service showcases, filterable portfolios, direct lead conversion channels (WhatsApp & Google Maps), and targeted local SEO.
- Analytics & Conversion Infrastructure: Configured end-to-end conversion tracking using Google Tag Manager, Google Analytics, and Google Ads to track lead acquisition and campaign performance.

Technologies Used
- Frontend: SvelteKit, Svelte, TypeScript, Tailwind CSS, Vite, PWA
- Backend & Sync: Supabase (PostgreSQL), PowerSync, Cloudflare Workers
- Hosting & Infrastructure: Cloudflare
- Analytics & Marketing: Google Tag Manager, Google Analytics, Google Ads, Google Maps API

Koprey
Software Engineer
September 2022 - Present (4 years 3 months)
Jeddah, Makkah, Saudi Arabia

Architect and deliver end-to-end digital solutions, custom web applications, and mobile products for client projects spanning e-commerce, social media, and educational platforms. Manage the complete software development lifecycle (SDLC) from initial requirement gathering and system architecture to frontend development, API integration, deployment, and ongoing maintenance.

Key Responsibilities & Achievements
- End-to-End Application Development: Design, build, and deploy responsive web platforms and cross-platform mobile applications using Python, Django, Flutter, JavaScript, and modern frontend frameworks.
- Backend Architecture & API Integration: Architect secure server-side logic, design SQL databases, and integrate RESTful APIs to streamline data processing, optimize application state, and ensure system reliability.
- UI/UX & Frontend Engineering: Build intuitive, accessible, and high-performance user interfaces, optimizing client-side rendering, cross-browser compatibility, and mobile responsiveness.
- System Design & Requirements Analysis: Translate business objectives into detailed logical/physical specifications, network models, and scalable system architectures tailored to client requirements.
- Testing, Deployment & Maintenance: Manage continuous integration, automated/manual testing, system troubleshooting, and cloud deployment pipelines independently to maintain high application uptime and performance.

- Performance Optimization & Quality Assurance: Evaluate system telemetry, refactor existing codebases, and maintain technical documentation to maximize application speed, security, and long-term scalability.

Core Tech Stack
- Languages & Frameworks: Next.js, Svelte, Nuxt.js, Python, Django, Flutter, JavaScript (ES6+), HTML5, CSS3/SASS, SQL
- Backend & Database: RESTful APIs, PostgreSQL/MySQL, Database Modeling, Server Administration
- Tools & Practices: Git, Agile/Scrum Development, Technical Documentation, System Testing & Optimization

Fresh Futures Australia PTY LTD
Web scrapping / Software Developer (Python)
June 2022 - September 2022 (4 months)
Persiaran Bandar Utama, Bandar Utama, 47800 Petaling Jaya, Selangor, Malaysia

- Code Construction of Web scrapping using HTML and Python on beautiful soup, Selenium, Pycharm and more.
- Check and ensure that the data in the CSV files match what is on the websites and that the code is working and then keep/store the CSV files in Dropbox.
- Research into the best ways to develop/create/establish a system or element of our platform like chatbots, automated responses, etc.
- Assisting senior developers by coordinating project management activities.
- Automated python code and speed up production time with multiprocessing and multithreading where this speed up all web scraping website from double to ten times where each person will run code in maximum power of their devices and each device nowadays has 2 and more CPUs and each CPU will work on each search and get data at the same time (parallel).
- Automated dropbox API to be controlled by python code which lets other colleagues speed up in updating their daily progress instead of copying links by their self which will take more time than a code generator.

Fiverr
Full Stack Developer
March 2021 - June 2022 (1 year 4 months)

- Develop Multi-Platform Web App Using Django with Python
- Develop Multi-Platform Web App Using PHP
- Design and Develop Database using SQL server and MySQL

- Responsive Multiplatofrm using CSS Bootstrap and Javascript

INTI International University & Colleges
Secretary
August 2020 - June 2022 (1 year 11 months)
Malaysia

- Assist in organizing and coordinating events, meetings, and activities for the society.
- Manage and maintain records, files, and databases related to the society's activities and membership.
- Support the President and other executive members in their respective roles, including preparing reports.

Taif Tailor
Data Management Specialist
February 2015 - June 2018 (3 years 5 months)

- Entered data accurately and efficiently from invoices, into the company's designated software and database.
- Verified the accuracy and completeness of the entered data, ensuring that all required fields were filled appropriately.
- Collaborated with team members and supervisors to ensure smooth data entry operations and resolve any data-related issues or challenges.

Education

Coventry University
Bachelor of Science - BS, Computer Science, Computer Software Engineering · (2019 - 2022)

INTI International University & Colleges
Bachelor of Science - BS, Computer Science, Computer Software Engineering · (2019 - 2022)
